# Rapid PHP and RPG Web Development

WebSmart is an award-winning rapid development tool for creating strategic PHP and RPG desktop and mobile web applications. Its templates give you quick results and shorten the web development learning curve by generating the starting client and server-side logic for you. You can then add custom business logic in the WebSmart IDE to create applications for any business need.

Why WebSmart?

Rapid Development
WebSmart's templates create the starting code base and its IDE includes productivity tools that streamline development.

Strategic Applications
Extend your ERP and develop desktop and mobile web applications for any business need (B2B order entry, eCommerce, invoicing, inquiries and more).

Integration
Create multi-platform web applications over Db2, MySQL or Oracle and integrate with other web applications and platforms using APIs and web services.

Leverage RPG and Your IBM i
WebSmart was built with RPG programmers in mind and makes it easy to integrate existing RPG and COBOL code to leverage your investment in IBM i.

Open Source PHP
Choose between WebSmart's PHP and ILE editions. PHP is a popular open-source language that helps attract new developers.

World Class Technical Support
Our tech support team is consistently rated one of the best. You get unlimited support for the life of your support agreement and during your evaluation.

> "I was able to put together an entire online ordering process by myself using WebSmart. It took about half the time that it took a web development firm with a staff of about five programmers doing a similar project."

Carolyn Struck — Quadion Corporation

Kickstart Web Application Development

1 **Select a Template**

Start by choosing one of the many customizable templates.

2 **Complete Wizards**

Step through wizards that create the starting HTML, CSS and PHP, or RPG.

3 **Save & Run**

Access the application from any browser (incl. mobile devices). Runs with APACHE on IBM i.

DB2. | Microsoft® SQL Server® | Powered by MySQL® | zend DBi

PHP | RPG | HTML | CSS

You start with a fully functioning web application instead of trying to figure out where to begin.

Key features in WebSmart

Intelligent Templates
- Choose from many customizable themes
- Procedural, object-oriented and MVC templates
- Grid, input capable and SQL templates

Code Editor
- Syntax checker, code completion and debugger
- Functions to call back-end RPG programs
- HTML tools including wizards to add UI elements

Portals and Integration
- Optional Nexus Portal for secure, menu-based access
- SSL, encryption and data scrubbing
- Use JSON or XML to develop APIs and web services

Mobile Support
- Optimized for Android and iOS devices
- Responsive templates for desktop and mobile
- Add offline support, signature capture and more

Not enough time or staff for web development?

Optionally partner with Fresche Professional Services to kickstart your web and mobile development project or complete the whole project. Our team of full-time IBM i and Fresche solution experts can help you improve workflows, integrate with other platforms, develop sophisticated mobile applications and much more.
