Security as a Service (SECaaS)

Modular Protection for IBM i

Protect your IBM i environment with Fresche's Security as a Service, a flexible, modular solution designed to safeguard your systems against modern cybersecurity risks. Address vulnerabilities, scale protection, and stay compliant— without unnecessary complexity or hidden costs.

Why Fresche's SECaaS?

Fresche combines IBM i expertise with state-of-the-art security solutions to protect what matters most. Begin with **Audit,** a free vulnerability scanner that provides insights into your system's security.

Then scale your defenses with advanced modules like real-time threat detection, data encryption, and system security management, tailored to your unique environment.
