IBM i Application Modernization

Modern Web UI for IBM i Green Screens

Key Features

Mobile Access
Access all of your modernized IBM i green screens internally or remotely from iPads, iPhones, and other tablets and smartphones.

Immediate Results
All of your existing green screens are instantly accessible as modern web pages without requiring changes to your RPG or COBOL source code.

RPG OA - 5250 - API
With 5250 datastream, OA and API options in a single product, you get to choose the approach that best meets your needs.

All-Inclusive Subscription
Enjoy flexible subscription-based access to Presto and unlock the power of a reliable, modern solution, designed to effortlessly adapt to your growing needs.

Intuitive Web UI
Keep your IBM i relevant in the eyes of end users and management by giving your existing green screens and new RPG programs a web UI.

New Functionality
Increase productivity by adding drop down boxes, tabs, datepickers, images, charts and more to your web-enabled screens.
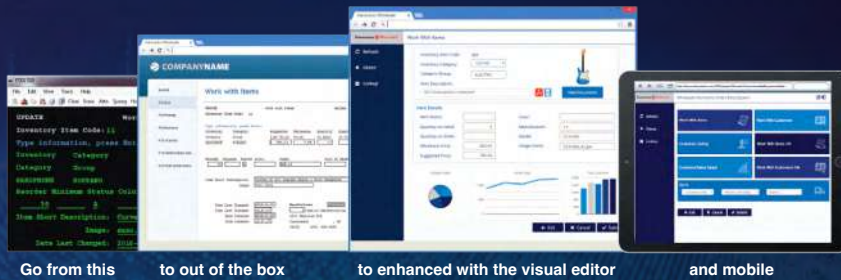

Presto is the fastest way to give your green screens and new RPG applications the modern interface users expect. They benefit from intuitive screens that are accessible from desktops and mobile devices. Presto also makes it easy for IBM i programmers without HTML experience to add new functionality that increases productivity.

> Out of the box, Presto converted our existing applications into web applications that we can also use on mobile devices, all without requiring us to change any code. I'm a 25+ year RPG developer but learning this tool was simple.

Simplot.

Go from this   to out of the box   to enhanced with the visual editor   and mobile

Benefits

Out of the Box Rendering

- On-the-fly HTML rendering - no source needed
- Auto detects subfiles, function keys and more
- Customizable skins and other global settings

Mobile, Portals and Integration

- Responsive screens optimized for desktop/mobile
- Optional Nexus Portal for secure, menu-based access
- Integrate with other web apps using links and APIs

Visual Editor

- Add date pickers, images, tabs and more
- Include links to PDF, Excel and other files
- Use SQL for charts, autocompletes and drop downs

Insights

- Heat map of IBM i application usage
- Visually shows how users spend time in applications
- Helps you priortize application modernization needs
