Modernization as a Service (MaaS)
Your Modernization Approach, Your Timelines, Your Budget

Transform Your Legacy Systems with Confidence

Your IBM i systems power critical business processes, but you're facing the growing challenge of maintaining applications built on legacy languages like RPG, SYNON, and COBOL. As you face mounting technical debt, escalating maintenance costs, and skill shortages, it's time to consider a better way: Modernization as a Service.

The MaaS Advantage

MaaS is an AI-powered, subscription-based modernization solution that transforms how organizations approach legacy system updates. Whether you need a modern web UI or complete code transformation, we provide the expertise that helps you define success on your terms, at your own pace, within your budget.

AI-Powered Modernization Factory
Transform legacy applications 25% faster with clean, maintainable code.

Pay-As-You-Go Flexibility
Avoid hefty upfront costs with a scalable, monthly subscription-based model.

Phased Implementation
Achieve measurable ROI with quick wins at every phase of modernization.

Future-Ready Technology Stack
Transition to modular, portable, and contemporary technologies.

Overcome Skill Shortages
Unlock access to a broader talent pool by modernizing coding languages.

Zero Vendor Lock-In
Retain full ownership of your modernized applications with no dependencies.

IBM i Modernization on Your Terms

Every organization's modernization journey is unique. Fresche combines decades of IBM i expertise with AI-powered tools to deliver tailored services that align with your goals, budget, and timeline — ensuring fast results and modernization that fits your business.

AI-Powered Application Development
Leverage Fresche's advanced AI tools to accelerate development and deliver next-gen IBM i applications.

Application Transformation
Convert RPG, COBOL, and SYNON applications into modern languages. Reduce technical debt and gain access to a broader talent pool.

Reimagine Applications
Develop ERP extensions, B2B order entry portals, dashboards, and APIs to unlock growth and meet evolving business needs.

UI Modernization
Upgrade outdated green screens to sleek, mobile-friendly web interfaces. Improve workflows, productivity, and user experience.

Database Modernization
Transition from DDS to DDL for better analytics, improved data portability, and seamless integration with modern systems.

Coexistence Technology
Modernize legacy code without breaking what works, ensuring a seamless transition to contemporary technologies.

Modernization Made Simple

- Get a free assessment to identify opportunities for improvement in your IBM i systems.

Analyze Your Environment

- Set clear goals and create a detailed plan with priorities and measurable outcomes.

Define Your Roadmap

- Implement changes incrementally to minimize disruption and maintain predictable costs.

Modernize in Phases

> With Fresche, we now have an entire company specializing in the IBM i environment, offering tools, deep expertise, and skilled analysts."

Julie LaCapruccia, Vice President of Operations
