

Security Suite

Security & Compliance for IBM i

Comprehensive IBM i Security, Auditing & Intrusion Detection

Key Features

- **Ransomware Protection**
Monitor traffic to your IBM i through exit point connections like FTP telnet and ODBC, as well as socket layer access.
- **Exit Point Security**
Lock down, monitor, and get real-time notifications about your exit points and access pre-defined security compliance reports.
- **Compliance & Auditing**
Easily ensure compliance with industry standards and streamline auditing processes for enhanced regulatory adherence.
- **Data Encryption**
Encrypt, mask, and scramble field values so you can protect your data and comply with security regulations such as PCI and HIPAA. Get real-time alerts when sensitive data is accessed.
- **Intrusion Detection & SIEM Integration**
Identify the right data to analyze and get alerts to security incidents as they occur to stop intrusions and minimize internal and external threats.
- **Multi-Factor Authentication (MFA)**
Implement an extra layer of security on user account access by requiring token entry in addition to passwords.

Business-critical data on IBM i is not immune to ransomware, cybercrimes, and data theft. Key areas of exposure include the files and directories in your IFS and network connectivity such as ODBC, FTP, web server applications, and other socket connections.

The Fresche Security Suite is used daily by Fortune 500 and Global 200 companies to increase governance and compliance, mitigate risk, and deliver greater operational efficiency.

All-Inclusive Subscription

\$833 / month (billed annually per server (P05, P10, P20, P30))

- What's included:
- Full access to all Fresche Security Suite features and modules
 - Unlimited users
 - Technical support & onboarding
 - No upgrade/transfer fees

Solutions

Audit

- Security Auditing
- Security Compliance Regulation Report Cards
- Security & Configuration Reports
- Data-level Auditing and Reporting
- Privileged User / Job Activity Monitor
- Authority Collection Integration

Detect

- Security Event Monitoring & Alerting
- Advanced SIEM Integration
- Email Alert Notifications
- History Log Monitor
- Message Queue Monitor
- Security Audit Journal QAUDJRN Monitor
- Command Monitor

Secure

- Security Management & Access Controls
- Network/Exit Point Security
- Object & IFS Security
- Privileged Access Management
- Inactive Session Lockdown
- Enhanced User Profile Management
- Command Security
- System Value Management

Encrypt

- Database Field Protection
- Sensitive Field Identification Assistance
- Field-level Encryption
- Masking
- Data Scrambling

About Fresche

Innovators in AI-powered IT modernization, Fresche manages and maximizes the value of IBM i and Microsoft business-critical systems. Our market-leading IP and proven solutions in Modernization, Managed Services, Data Analytics & AI, and Software have earned the trust of global leaders from 2,200+ companies.
