Specialist  
Data Warehouse Migration  
Analytics

### AI-Powered Insights for Modern Business

Most organizations already have the data they need — it’s trapped in silos across ERP systems, legacy databases, and cloud platforms. Fresche’s Data Analytics & AI solutions break down these barriers to deliver real-time insights that drive faster decisions and measurable business impact.

As a certified Microsoft Solutions Partner and direct Cloud Solution Provider (CSP), we bring deep technical expertise and proven frameworks to help enterprises modernize their data environments, implement practical AI solutions, and unlock the full potential of the Microsoft ecosystem.

The AI in Action Workshop gave us a clear roadmap to transform our operations. We identified high-impact use cases, aligned our teams, and left with a detailed plan to drive measurable business results.”

Regional Beverage Distributor

#### AI & Advanced Analytics

Fresche builds transformational AI solutions that ensure direct business impact. We work directly with operations, finance, and IT teams to find AI use cases that move the needle, then we prototype quickly, prove value, and scale what works.

#### Data & Analytics Modernization

Modernize reporting, pipelines, and data platforms using Microsoft Fabric, Azure, and Power Platform, without disrupting the business.

#### Microsoft Fabric Consulting

Simplify data complexity with Microsoft Fabric. From strategy to rollout, we help teams build a unified, trusted data foundation.

#### Microsoft Cloud Modernization

Bring structure and control to Azure, Microsoft 365, Fabric, Power BI, SQL Server, and more. Strategy, optimization, and licensing managed by a single expert partner.

#### OmniAnalytics for Dynamics 365 ERP

Prebuilt Fabric-based analytics for D365 BC and F&SCM. Delivers real-time reporting with ready-made data models and templates from day one.

# Getting Started: Turning Challenges into Opportunities

## PROBLEM

Misconfigured Azure cloud environments causing inefficiencies.

## SOLUTION

### Azure Tenant Health Check

Optimize performance, security, and cost with a detailed analysis of your Azure setup.

Disconnected management across IBM and Microsoft ecosystems.

### Your Microsoft CSP

Simplify licensing, optimize costs, and unify management across IBM and Microsoft ecosystems.

Outdated or fragmented analytics environments.

**Power BI Dashboard in a Day Workshop** Modernize your analytics with interactive dashboards and actionable insights.

Siloed data sources preventing unified analytics.

### Microsoft Fabric in Action Workshop

Build a unified data environment and roadmap for seamless analytics integration.

Manual, outdated reporting from IBM i Db2.

### IBM i Db2 Analytics Accelerator

Seamlessly integrate your IBM i data with Microsoft Fabric to automate and simplify reporting and dashboards for quicker analysis.

Unclear AI use cases and lack of practical application.

### AI in Action Workshop

Identify and prioritize high-impact AI use cases, delivering a clear execution roadmap aligned with business goals.
