

# Modernization as a Service (MaaS)

Your Modernization Approach, Your Timelines, Your Budget

## Transform Your Legacy Systems with Confidence

Your IBM i systems power critical business processes, but you're facing the growing challenge of maintaining applications built on legacy languages like RPG, SYNON, and COBOL. As you face mounting technical debt, escalating maintenance costs, and skill shortages, it's time to consider a better way: Modernization as a Service.

## The MaaS Advantage

MaaS is an AI-powered, subscription-based modernization solution that transforms how organizations approach legacy system updates. Whether you need a modern web UI or complete code transformation, we provide the expertise that helps you define success on your terms, at your own pace, within your budget.

 **AI-Powered Modernization Factory**  
Transform legacy applications 25% faster with clean, maintainable code.

 **Pay-As-You-Go Flexibility**  
Avoid hefty upfront costs with a scalable, monthly subscription-based model.

 **Phased Implementation**  
Achieve measurable ROI with quick wins at every phase of modernization.

 **Future-Ready Technology Stack**  
Transition to modular, portable, and contemporary technologies.

 **Overcome Skill Shortages**  
Unlock access to a broader talent pool by modernizing coding languages.

 **Zero Vendor Lock-In**  
Retain full ownership of your modernized applications with no dependencies.

# IBM i Modernization on Your Terms

Every organization's modernization journey is unique. Fresche combines decades of IBM i expertise with AI-powered tools to deliver tailored services that align with your goals, budget, and timeline, ensuring fast results and modernization that fits your business.

## AI-Powered Application Development

Leverage Fresche's advanced AI tools to accelerate development and deliver next-gen IBM i applications.

## UI Modernization

Upgrade outdated green screens to sleek, mobile-friendly web interfaces. Improve workflows, productivity, and user experience.

## Application Transformation

Convert RPG, COBOL, and SYNON applications into modern languages. Reduce technical debt and gain access to a broader talent pool.

## Database Modernization

Transition from DDS to DDL for better analytics, improved data portability, and seamless integration with modern systems.

## Reimagine Applications

Develop ERP extensions, B2B order entry portals, dashboards, and APIs to unlock growth and meet evolving business needs.

## Coexistence Technology

Modernize legacy code without breaking what works, ensuring a seamless transition to contemporary technologies.

## Modernization Made Simple

- Get a free assessment to identify opportunities for improvement in your IBM i systems.

### Analyze Your Environment

- Set clear goals and create a detailed plan with priorities and measurable outcomes.

### Define Your Roadmap

- Implement changes incrementally to minimize disruption and maintain predictable costs.

### Modernize in Phases

With Fresche, we now have an entire company specializing in the IBM i environment, offering tools, deep expertise, and skilled analysts."

**Julie LaCapruccia**, Vice President of Operations

### About Fresche
