

FRESCHÉ

LESS TIME DECODING, MORE TIME FIXING

OpsIQ: Your AI Operations Assistant for IBM i

Don't recognize that QSYSOPR message? Ask OpsIQ in plain language and get root cause and next steps in seconds.

Get Started

HOW OPSIQ HELPS

Shorten Every Investigation

AI CHAT BOT

Skip the Lookup

Ask a plain-language question and get a direct answer back in seconds, straight from your live IBM i system.

DASHBOARD

Your System at a Glance

See jobs, disk, job failures, alerts, and sign-on activity on one screen. Color-coded tiles show what needs attention first.

INVESTIGATE BUTTON

One Click to Root Cause

Hit Investigate on any message and OpsIQ pulls the context and starts a structured investigation for you.

QSYSOPR MESSAGE FEED

See What Matters First

Messages arrive sorted Critical, Warning, and Info the second you sign in, so the one that matters is right at the top.

CHAT HISTORY

Pick Up Where You Last Left Off

Every conversation is saved and searchable, so the next shift can see exactly how something was resolved.

SUGGESTED FOLLOW-UPS

Know What to Ask Next

After each answer, OpsIQ suggests follow-up questions based on the conversation, so you can keep digging into the issue.

SECURITY & ACCESS

Built for Peace of Mind

OpsIQ signs in with your existing IBM i profile and only reads data, so nothing on your system changes.

AUDIT LOG

Every Answer on the Record

Every AI interaction is logged automatically: timestamp, user, message ID, severity, prompt, and response. Ready for compliance reviews.

HOW IT WORKS

Go From Question to Next Step in Seconds

1 Sign In

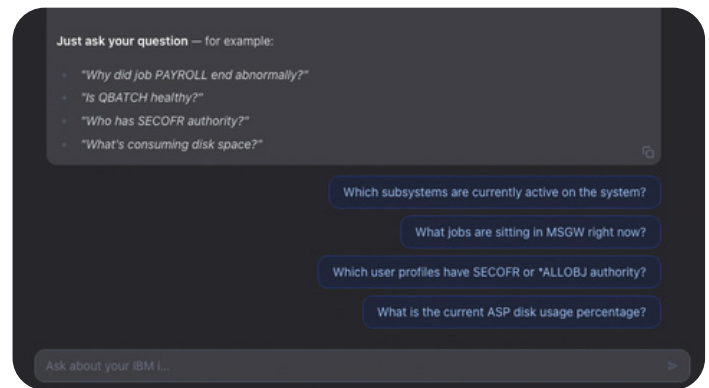

Use the IBM i user profile you already have. No new setup, no new password to remember.

2 Ask or Investigate

Type a plain-language question, or hit Investigate on any QSYSOPR message that catches your eye.

3 Get Your Answer

Root cause and a recommended next step, back in seconds. No job log digging required.

How Much Time Could Your Team Get Back?

Plug in your message volume and team size to estimate how much time OpsIQ saves your operators every day.

GETTING STARTED

See it Work on Your Own System

The best way to see how much time OpsIQ saves is on your own system. It works alongside the monitoring tools you already use, like Robot or Halcyon, and signs in with your existing IBM i profile.

3

Ways to start: investigate, ask, or paste an alert
