Green Screen Modernization and Mobilization

Presto is the fastest way to give your green screens and new RPG applications the modern web GUI users expect. They benefit from intuitive screens that are accessible from desktops and mobile devices. Presto also makes it easy for IBM i programmers without HTML experience to add new functionality that increases productivity.

Why Presto?

**Intuitive Web GUI**
Presto transforms your green screens into modern, intuitive web pages that increase user satisfaction and reduce training costs.

**Immediate Results**
All of your existing green screens are instantly accessible as modern web pages without requiring changes to your RPG or COBOL source code.

**End User Productivity**
Improve workflows by enhancing screens with tabs, drop downs, autocompletes, datepickers and more without coding HTML.

**RPG OA - 5250 - API**
With 5250 datastream, OA and API options in a single licensed product, you get to choose the approach that best meets your needs.

**Easy Deployment and Access**
Users only need a browser to access the web-enabled screens internally or remotely from desktops or mobile devices.

**World Class Technical Support**
Our tech support team is consistently rated one of the best. You get unlimited support for the life of your support agreement and during your evaluation.

“Out of the box, Presto converted our existing applications into web applications that we can also use on mobile devices, all without requiring us to change any code. I'm a 25+ year RPG developer but learning this tool was simple.”

Gene Schumaker — J.R. Simplot

Key features in Presto

**Out of the Box Rendering**
- On-the-fly HTML rendering - no source needed
- Auto detects subfiles, function keys and more
- Customizable skins and other global settings

**Insights**
- Heat map of IBM i application usage
- Visually shows how users spend time in applications
- Helps you prioritize application modernization needs

**Visual Editor**
- Add date pickers, images, tabs and more
- Include links to PDF, Excel and other files
- Use SQL for charts, autocompletes and drop downs

**Mobile, Portals and Beyond**
- Responsive screens optimized for desktop/mobile
- Optional Nexus Portal for secure, menu-based access
- Integrate with other web apps using links and APIs

Not enough time or staff to modernize?

Optionally partner with Fresche Professional Services to kickstart your green screen modernization project or complete the whole project. Our team of full-time IBM i and Fresche solution experts can help you improve workflows, integrate with other platforms, develop sophisticated mobile applications and much more.
